

Project Brief

15th St. Improvements City of Dell Rapids, South Dakota

- 12" water main distribution line
- Major drainage improvements
- Improved intersection geometrics at 15th Street and Clark Avenue
- 9" concrete pavement

This project consisted of 3,700 L.F. of street improvements on 15th Street from Old Highway 77 to Clark Avenue in Dell Rapids. Also included in this project were improvements to the water main, sanitary sewer and storm sewer in conjunction with street improvements. Street paving on 15th Street was with 9" concrete, with some asphalt concrete paving used on intersecting street tie-ins. ADA accessible sidewalks were also installed on this project for safe access to the new elementary school.

- SRF Funding through SDDENR
- Community Access Grant through SDDOT
- Worked with road excavation depths of 18" to 24" at cemetery entrances requiring access coordination
